

Environmental Policy

At MPB Industries Ltd, we are committed to environmental stewardship, sustainability, and responsible business practices. We recognise the importance of reducing our carbon footprint and continuously improving our operations to minimise environmental impact.

Our Commitments

We demonstrate our environmental responsibility by:

- **Reducing Carbon Emissions** – measuring, reporting, and cutting both direct and indirect emissions across our operations and supply chain.
- **Improving Energy Efficiency** – investing in energy-efficient technologies, exploring renewable energy sources, and promoting conservation across our sites.
- **Managing Waste Responsibly** – reducing waste at source, increasing recycling, and ensuring safe disposal in line with best practice.
- **Engaging Employees** – educating our teams on environmental accountability, empowering them to make sustainable choices at work and beyond.
- **Working with Suppliers** – selecting partners who share our commitment to sustainability, prioritising recycled and responsibly sourced materials.
- **Investing in Sustainable Manufacturing** – applying best available techniques to reduce environmental impact in future developments.
- **Supporting our Community** – maintaining open communication and transparency about our environmental performance.

Carbon Reduction

We recognise the pressing need to tackle climate change. Our actions include:

- Measuring and reporting our carbon footprint regularly
- Promoting low-carbon transport options for staff and considering low-emission vehicles
- Prioritising renewable energy and energy-efficient equipment
- Working with suppliers to minimise emissions across the supply chain

Energy Management

We are dedicated to reducing energy consumption and greenhouse gas emissions by:

- Monitoring and reporting on energy usage to identify opportunities for improvement
- Procuring renewable energy where possible
- Encouraging energy-conscious behaviours among employees

Waste Management

We are committed to reducing landfill waste and maximising recycling by:

- Minimising packaging and reducing single-use materials
- Segregating waste responsibly and recycling paper, plastics, metals, and cardboard
- Managing hazardous waste safely and in line with regulations
